["hip", "hip"] (hip hip array!)

Professional Summary

Web developer with a vast array of knowledge in many different frontend and backend languages, responsive frameworks, databases, shell scripting, and best code practices along with UI and UX fundamentals. My objective is simply to be the best web developer that I can be and to use my potential at progressive technology companies. I am dedicated to perfecting my craft by learning from more seasoned developers, remaining humble, and continuously making strides to learn all that I can about development. While honing my skills in startup environments, I believe that my understanding of problem solving, being a self-starter, emotional intelligence and quickly learning new technologies has made me a formidable asset to small – medium sized teams and supplements gaps in my experience or skill repertoire.

Professional Work Experience

Sr. Frontend Engineer, March 2017 – Present

Frontend Engineer, July 2016 – March 2017

Evus Technologies, Las Vegas, NV

Job Type: Full-Time / Part-time Remote (Jan '18)

Responsibilities:

- Engineer, design, and maintain software projects for Evus & their clients using the following technologies:
- Node.js, AngularJS, IBM Strong Loop, Docker, ReactJS, Sass, MySQL & Redis.
- Setup and maintain cloud based servers using AWS.
- Setup, deployed and maintained Jenkins CI environments.
- Maintained and setup all IAM security for AWS cloud assets, servers and user accounts.

Started at Evus as the point man for a revive and major refactor of an MVP AngularJS / Node.js project which was an B2B E-commerce platform with admin portal. Was tasked with setting up company documentation for code standards and developer install tools. Lead a team of 4 frontend developers while managing multiple projects for numerous clients. Ensured timelines were met; tasks being completed and removing any roadblocks; code standards were being practiced and pair programming and debugging with JR Developers. Was an extensive asset in meetings for setting project timelines and feature scopes and helping design the UI and UX for projects ensure seamless experience for end users. Was promoted for my excellent work from both satisfied clients and executive's.

Frontend Developer, July 2015 – July 2016

Rally Point Solutions, Las Vegas, NV

Job Type: Full-Time

Responsibilities:

Oversaw frontend development and set standards for writing sass and ruby on rails. Built and deployed numerous cloud environments hosted on Azure for our AngularJS, ReactJS, Ruby on Rails and Node.js projects. Managed all servers hosting Redhat OS, and built extensive CLIs built with bash/shell script to allow easy management of all projects, servers, environments and logs.

Frontend Engineer, October 2014 – June 2015

Verde Circle, Santa Monica, CA

Job Type: Full-Time

Responsibilities:

- Design and implement code for both company website, logistics SaaS program and community helpdesk & forum.
 - Worked on apps using Ruby on Rails, AngularJS, Bootstrap 3, Sass, .NET, MySQL, PostgreSQL, Google Cloud.
 - Worked with build tools such as Grunt.JS and Gulp.
 - Implemented new company blog in MVC .NET.
-
